## Item 7.01. Regulation FD Disclosure.

Mondelēz International, Inc. and subsidiaries (collectively, “we,” “our” or “Mondelēz International”) are furnishing this current report to provide supplemental non-GAAP financial information related to the retrospective impact of our April 3, 2023, sale of JDE Peet’s (“JDEP”) shares.

Due to our reporting of JDEP’s results on a one-quarter lag basis, the impact of the sale of these shares will affect our non-GAAP financial results beginning with the third quarter ended September 30, 2023. Consistent with our definitions of our non-GAAP financial measures, we will reflect this partial sale of our equity method investment in JDEP as a divestiture. This change will result in the recasting of our historical non-GAAP financial results and provides additional information to facilitate comparisons of historical operating results, identify trends in our underlying operating results and provide additional insight and transparency on how we evaluate our business.

### *Change to our Historical Non-GAAP Financial Results in Connection with our Sale of JDEP Shares*

As previously disclosed in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2023, on April 3, 2023, we sold approximately 7.7 million shares of JDEP, which reduced our ownership interest by 1.6%, from 19.7% to 18.1% of the total outstanding shares. We received cash proceeds of €198 million (\$217 million) and recorded a loss of €18 million (\$19 million) during the three months ended June 30, 2023. We continue to have board representation with two directors on JDEP’s Board of Directors and have retained certain additional governance rights. As we continue to have significant influence, we continue to account for our investment in JDEP under the equity method.

We consider the 1.6% ownership reduction resulting from this sale of shares a partial sale of our equity method investment in JDEP. Consistent with our definitions of our non-GAAP financial measures, we consider this sale to be a divestiture. Due to our reporting of JDEP’s results on a one-quarter lag basis, the impact of the sale of these shares will affect our non-GAAP financial results beginning with the third quarter ended September 30, 2023. As such, we have removed the equity method investment net earnings results related to this partial sale of our equity method investment in JDEP from our non-GAAP financial results for Adjusted EPS for all historical periods presented. Our U.S. GAAP results, which include our historical equity method investment net earnings from JDEP, will not change from the prior presentation.

### *Recast Amounts Reflecting Changes in Historical Non-GAAP Results*

See the summary chart below and Exhibit 99.1 for the unaudited GAAP and recast non-GAAP financial information for the first two quarters and six months of 2023, all quarters of 2022 and 2021, and the years ended December 31, 2022, and 2021. This supplemental disclosure does not amend any disclosure contained in any of our prior filings with the Securities and Exchange Commission.

## ***Financial Schedules***

Exhibit 99.1 to this Form 8-K contains financial schedules that provide the reconciliations for our recast non-GAAP financial results for Adjusted EPS, due to the partial sale of our equity method investment in JDEP, for first two quarters and six months of 2023, all quarters of 2022 and 2021, and the years ended December 31, 2022, and 2021.

- Schedule 1 provides reconciliations of the differences between reported (GAAP) financial measures for Operating Income to Net Earnings Attributable to Mondelēz International and the recast Adjusted (non-GAAP) financial measures for these items. Equity method investment net earnings and provision for income taxes are components used to calculate net earnings and diluted earnings per share attributable to Mondelēz International.
- Schedule 2 provides reconciliations between reported Diluted EPS attributable to Mondelēz International (GAAP) and the recast Adjusted EPS (non-GAAP) for comparative periods.

## ***Non-GAAP Financial Measures***

We use non-GAAP financial information and believe it is useful to investors as it provides additional information to facilitate comparisons of historical operating results, identify trends in our underlying operating results, and provide additional insight and transparency on how we evaluate our business. For additional information regarding our non-GAAP financial measures, see Exhibit 99.2.

This information, including Exhibits 99.1 and 99.2, will not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or otherwise subject to the liabilities under that section and it will not be incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as expressly set forth by specific reference in such a filing.

## Exhibit 99.2

### ***Non-GAAP Financial Measures – Additional Information***

We use non-GAAP financial information and believe it is useful to investors as it provides additional information to facilitate comparisons of historical operating results, identify trends in our underlying operating results, and provide additional insight and transparency on how we evaluate our business. We use non-GAAP financial measures to budget, make operating and strategic decisions and evaluate our performance. We have detailed below the adjustments that we make in our non-GAAP financial measures that were affected by the partial sale of our equity method investment in JDEP. Our adjustments generally fall within the following categories: acquisition & divestiture activities, gains and losses on intangible asset sales and non-cash impairments, major program restructuring activities, constant currency and related adjustments, major program financing and hedging activities and other major items affecting comparability of operating results. We believe the non-GAAP measures should always be considered along with the related U.S. GAAP financial measures.

The definition of our non-GAAP financial measures did not change because of the partial sale of our equity method investment in JDEP. For all periods presented in this Form 8-K, our non-GAAP financial measure for Adjusted EPS is defined below. As new events or circumstances arise, these definitions could change over time. When definitions change, we provide the updated definitions and present the related non-GAAP historical results on a comparable basis <sup>(1)</sup>.

*Adjusted EPS* – defined as diluted EPS attributable to Mondelēz International from continuing operations (the most comparable U.S. GAAP financial measure) excluding the impacts of the impacts of the Simplify to Grow Program <sup>(2)</sup>; gains or losses (including non-cash impairment charges) on goodwill and intangible assets; divestiture <sup>(3)</sup> or acquisition gains or losses, divestiture-related costs <sup>(4)</sup>, acquisition-related costs <sup>(5)</sup>, and acquisition integration costs and contingent consideration adjustments <sup>(6)</sup>; inventory step-up charges <sup>(7)</sup>; net earnings from divestitures <sup>(3)</sup>; remeasurement of net monetary position <sup>(8)</sup>; mark-to-market impacts from commodity, forecasted currency and equity method investment transaction derivative contracts <sup>(9)</sup>; impact from resolution of tax matters <sup>(10)</sup>; 2017 malware incident net recoveries; incremental costs due to the war in Ukraine <sup>(11)</sup>; impact from the European Commission legal matter <sup>(12)</sup>; impact from pension participation changes <sup>(13)</sup>; costs associated with the JDE Peet's transaction; losses on debt extinguishment and related expenses; gains or losses on interest rate swaps no longer designated as accounting cash flow hedges due to changed financing and hedging plans; mark-to-market unrealized gains or losses and realized gains or losses from marketable securities <sup>(14)</sup>; initial impacts from enacted tax law changes <sup>(15)</sup>; and gains or losses on equity method investment transactions. Similarly, within Adjusted EPS, our equity method investment net earnings exclude our proportionate share of our investees' significant operating and non-operating items <sup>(15)</sup>. We believe that Adjusted EPS provides improved comparability of underlying operating results. We also evaluate growth in our Adjusted EPS on a constant currency basis <sup>(17)</sup>.

1. When items no longer impact our current or future presentation of non-GAAP operating results, we remove these items from our non-GAAP definitions. In the first quarter of 2023, we added to the non-GAAP definition for divestitures the inclusion of changes from equity method investment accounting to accounting for equity interests with readily determinable fair values ("marketable securities"; refer to footnote (2) below). In addition, we added to the non-GAAP definitions the exclusion of gains or losses associated with marketable securities (see footnote (15) below).
2. Non-GAAP adjustments related to the Simplify to Grow Program reflect costs incurred that relate to the objectives of our program to transform our supply chain network and organizational structure. Costs that do not meet the program objectives are not reflected in the non-GAAP adjustments.
3. Divestitures include completed sales of businesses, exits of major product lines upon completion of a sale or licensing agreement, the partial or full sale of an equity method investment and changes from equity method investment accounting to accounting for marketable securities. As we record our share of JDE Peet's ongoing earnings on a one-quarter lag basis, any JDE Peet's ownership reductions are reflected as divestitures within our non-GAAP results the following quarter.
4. Divestiture-related costs, which includes costs incurred in relation to the preparation and completion (including one-time costs such as severance related to elimination of stranded costs) of our divestitures as defined in footnote (3), also includes costs incurred associated with our publicly announced processes to sell businesses. We exclude these items to better facilitate comparisons of our underlying operating performance across periods.

5. Acquisition-related costs, which includes transaction costs such as third party advisor, investment banking and legal fees, also includes one-time compensation expense related to the buyout of non-vested ESOP shares. We exclude these items to better facilitate comparisons of our underlying operating performance across periods.
6. Acquisition integration costs and contingent consideration adjustments include one-time costs related to the integration of acquisitions as well as any adjustments made to the fair market value of contingent compensation liabilities that have been previously booked earn-outs related to acquisitions that do not relate to employee compensation expense. We exclude these items to better facilitate comparisons of our underlying operating performance across periods.
7. In the third quarter of 2022, we began to exclude the one-time inventory step-up charges associated with acquired companies related to the fair market valuation of the acquired inventory. We exclude this item to better facilitate comparisons of our underlying operating performance across periods.
8. In connection with our applying highly inflationary accounting (refer to Note 1, Summary of Significant Accounting Policies in our Annual Report on Form 10-K for the year ended December 31, 2022), for Argentina (beginning in the third quarter of 2018) and Türkiye (beginning in the second quarter of 2022), we exclude the related remeasurement gains or losses related to remeasuring net monetary assets or liabilities denominated in the local currency to the U.S. dollar during the periods presented.
9. We exclude unrealized gains and losses (mark-to-market impacts) from outstanding commodity and forecasted currency and equity method investment transaction derivative contracts from our non-GAAP earnings measures. The mark-to-market impacts of commodity and forecasted currency transaction derivatives are excluded until such time that the related exposures impact our operating results. Since we purchase commodity and forecasted currency transaction contracts to mitigate price volatility primarily for inventory requirements in future periods, we make this adjustment to remove the volatility of these future inventory purchases on current operating results to facilitate comparisons of our underlying operating performance across periods. We exclude equity method investment transaction derivative contract settlements as they represent protection of value for future divestitures.
10. Refer to Note 14, *Commitments and Contingencies – Tax Matters*, in our Annual Report on Form 10-K for the year ended December 31, 2022, for additional information.
11. In February 2022, Russia began a military invasion of Ukraine, and we stopped our production and closed our facilities in Ukraine for a period of time due to damage incurred to our facilities during the invasion. We began to incur incremental costs directly related to the war including asset impairments, such as property and inventory losses, higher expected allowances for uncollectible accounts receivable and committed compensation. We have isolated and exclude these costs and related impacts from our operating results to facilitate evaluation and comparisons of our ongoing results. Incremental costs related to increasing operations in other primarily European facilities are not included with these costs.
12. In the fourth quarter of 2022, we began to exclude the impact from the European Commission legal matter. In November 2019, the European Commission informed us that it initiated an investigation into our alleged infringement of European Union competition law through certain practices allegedly restricting cross-border trade within the European Economic Area. On January 28, 2021, the European Commission announced it had taken the next procedural step in its investigation and opened formal proceedings. We have been cooperating with the investigation and are currently engaged in discussions with the European Commission in an effort to reach a negotiated, proportionate resolution to this matter. As of December 31, 2022, we recorded an estimate of the possible cost to resolve this matter. Due to the unique nature of this matter, we believe it to be infrequent and unusual and therefore exclude it to better facilitate comparisons of our underlying operating performance across periods. Refer to Note 14, *Commitments and Contingencies – Tax Matters*, in our Annual Report on Form 10-K for the year ended December 31, 2022, for additional information.
13. The impact from pension participation changes represents the charges incurred when employee groups are withdrawn from multiemployer pension plans and other changes in employee group pension plan participation. We exclude these charges from our non-GAAP results because those amounts do not reflect our ongoing pension obligations. See Note 11, *Benefit Plans*, in our Annual Report on Form 10-K for the year ended December 31, 2022, for more information on the multiemployer pension plan withdrawal.
14. In the first quarter of 2023, we began to exclude mark-to-market unrealized gains or losses, as well as realized gains or losses, associated with our marketable securities from our non-GAAP earnings measures. These marketable securities gains or losses are not indicative of underlying operations and are excluded to better facilitate comparisons of our underlying operating performance across periods.
15. We have excluded the initial impacts from enacted tax law changes. Initial impacts include items such as the remeasurement of deferred tax balances and the transition tax from the 2017 U.S. tax reform. We

exclude initial impacts from enacted tax law changes from our Adjusted EPS as they do not reflect our ongoing tax obligations under the enacted tax law changes.

16. We have excluded our proportionate share of our equity method investees' significant operating and non-operating items, such as acquisition and divestiture related costs, restructuring program costs and initial impacts from enacted tax law changes, in order to provide investors with a comparable view of our performance across periods. Although we have shareholder rights and board representation commensurate with our ownership interests in our equity method investees and review the underlying operating results and significant operating and non-operating items with them each reporting period, we do not have direct control over their operations or resulting revenue and expenses. Our use of equity method investment net earnings on an adjusted basis is not intended to imply that we have any such control. Our U.S. GAAP "diluted EPS attributable to Mondelez International from continuing operations" includes all of the investees' significant operating and non-operating items.
17. Constant currency operating results are calculated by dividing or multiplying, as appropriate, the current-period local currency operating results by the currency exchange rates used to translate the financial statements in the comparable prior-year period to determine what the current-period U.S. dollar operating results would have been if the currency exchange rate had not changed from the comparable prior-year period.

We believe that the presentation of these non-GAAP financial measures, when considered together with our U.S. GAAP financial measures and the reconciliations to the corresponding U.S. GAAP financial measures, helps provide a more complete understanding of the factors and trends affecting our business than could be obtained absent these disclosures. Because non-GAAP financial measures vary among companies, the non-GAAP financial measures presented in this report may not be comparable to similarly titled measures used by other companies. Our use of these non-GAAP financial measures is not meant to be considered in isolation or as a substitute for any U.S. GAAP financial measure. A limitation of the non-GAAP financial measures is they do not include all items of income and expense that affect us and have an impact on our U.S. GAAP reported results. The best way to address this limitation is by evaluating our non-GAAP financial measures in combination with our U.S. GAAP reported results and carefully evaluating the reconciliations of U.S. GAAP reported figures to the non-GAAP financial measures.
